

Corona Virus

Germs are tiny things that live everywhere. Sometimes germs cause people to become sick.

There is a new virus called Corona Virus. The Corona Virus germs spread easily.

The Corona Virus can make people have:

A sore throat

A cough

A fever. This is when the body feels very hot

The Corona Virus can also
make people feel tired

Or short of breath

If I feel unwell, I can tell an adult. They will help me

I might need to see a Doctor at the clinic or the hospital. This is okay. They will help me feel better

If I have Corona Virus I will need to stay home and rest until I feel healthy again

I can stay healthy by
washing my hands and
using hand sanitiser

1 2 3 4 5
6 7 8 9 10

When I wash my hands I
can sing Happy Birthday or
count to 20

I can stay healthy by
staying at home

I can stay healthy by
standing further away from
people

I can keep others healthy by coughing and sneezing into a tissue. If a tissue is not available, I can cough and sneeze into my elbow

If I feel worried about Corona Virus I can talk to an adult. They will help me feel better. I will be okay
